

# ONE ASIA PACIFIC UTILITIES PVT LTD

## Company Profile

### About the Company

One Asia Pacific Utilities Pvt. Ltd. is an ISO 9001:2015 certified company headquartered in India, specializing in high-quality cleaning, hygiene, sanitation, renewable energy, and utility solutions. Established in 2012, the company has steadily evolved into a trusted name across industrial, commercial, institutional, and residential sectors. With its registered office in Chennai and corporate presence in Coimbatore and Mysore, One Asia Pacific Utilities combines innovation, technical expertise, and operational excellence to deliver reliable and sustainable solutions to customers in both domestic and international markets.

One Asia Pacific Utilities Pvt. Ltd. has strategically evolved into a diversified enterprise with its core focus on Utility-Scale and Commercial Renewable Energy Solutions, complemented by Commodity Trading & Global Sourcing and Industrial Cleaning & Hygiene Solutions.

The company's flagship business is its Renewable Energy & EPC Division, delivering comprehensive Concept-to-Commissioning (C2C) solutions for Utility-Scale and Commercial Solar Power Projects, as well as Wind and Hybrid Renewable Energy Systems. With expertise spanning project development, engineering, procurement, construction, grid integration, solar asset management, operations & maintenance, performance optimization, and innovative Solar-as-a-Service (SaaS) subscription solutions, One Asia Pacific Utilities provides reliable, scalable, and sustainable energy infrastructure for industrial, commercial, institutional, utility, and government sectors.

### Vision

To become a globally respected and trusted enterprise delivering excellence in Utility-Scale and Commercial Renewable Energy Solutions, creating sustainable value through innovation, operational excellence, and environmentally responsible business practices.

### Mission

Deliver world-class Utility-Scale and Commercial Solar, Wind, and Hybrid Renewable Energy solutions through comprehensive Concept-to-Commissioning (C2C) EPC services, innovative Solar-as-a-Service (SaaS) models, and lifecycle asset management.

Drive innovation, sustainability, and operational excellence by adopting advanced technologies, engineering best practices, and intelligent digital solutions across all business verticals.

Build enduring partnerships with customers, investors, suppliers, and stakeholders through integrity, quality, reliability, and exceptional service delivery.

Contribute to a cleaner, greener, and more sustainable future by promoting renewable energy adoption, responsible resource management, and environmentally conscious business practices.

## Utility-Scale, Commercial & Industrial (C&I) Solar Solutions

One Asia Pacific Utilities Pvt. Ltd. is a leading renewable energy solutions provider specializing in **Utility-Scale Solar Power Projects** and **Commercial & Industrial (C&I) Solar Solutions**. With a strong commitment to supporting the global transition towards clean and sustainable energy, the company delivers comprehensive EPC services and innovative energy delivery models that enable organizations to achieve long-term energy security, operational efficiency, and environmental sustainability.

From large utility-scale solar farms supplying power to the grid to customized rooftop and ground-mounted installations for commercial and industrial facilities, One Asia Pacific Utilities provides integrated **Concept-to-Commissioning (C2C)** solutions supported by advanced engineering, intelligent technologies, and lifecycle asset management.

Recognizing the evolving energy requirements of modern businesses, the company also offers **Solar-as-a-Service (SaaS)**—an innovative subscription-based renewable energy solution that enables organizations to transition to clean energy without the complexities of solar asset ownership. Under this model, customers receive a fully managed solar energy solution while One Asia Pacific Utilities undertakes the complete responsibility for project development, engineering, installation, operations, maintenance, monitoring, and long-term asset management.

Whether through conventional EPC execution or the subscription-based Solar-as-a-Service model, the company's objective remains the same—to deliver reliable, efficient, scalable, and future-ready renewable energy infrastructure that maximizes performance, enhances operational resilience, and creates long-term value for customers.

## Comprehensive Renewable Energy Solutions

- Utility-Scale Solar Power Plants
- Commercial & Industrial (C&I) Solar Projects
- Rooftop Solar Installations
- Ground-Mounted Solar Farms
- Solar-as-a-Service (SaaS) Subscription Solutions
- Hybrid Renewable Energy Systems
- Solar Power Plant Design & Engineering
- Energy Audits & Load Assessment
- Technical Feasibility Studies
- Financial & Project Evaluation
- Procurement of Tier-1 Solar Components
- Transmission & Electrical Infrastructure
- Grid Synchronization & Regulatory Compliance
- Battery Energy Storage System (BESS) Integration
- SCADA & Intelligent Performance Monitoring
- Solar Asset Management
- Operations & Maintenance (O&M)
- Performance Optimization & Lifecycle Management

## Solar-as-a-Service (SaaS)

The infographic is titled "POWERING A BRIGHTER TOMORROW" and is for "Solar-as-a-Service (SaaS) for Commercial Projects". It features a central image of a modern building with a large solar panel array on its roof. The background is a cityscape at sunset. The infographic is divided into several sections:

- NO CAPEX. NO HASSLE. JUST CLEAN ENERGY.**
- ZERO INVESTMENT**: We invest. You save.
- SUBSCRIPTION MODEL**: Pay a fixed monthly fee. Predictable & affordable.
- COMPLETE SOLUTION**: Design, install, operate & maintain – We do it all.
- CLEAN & SUSTAINABLE**: Reduce carbon footprint & support a green future.
- SMART ENERGY. SIMPLE SUBSCRIPTION. MAXIMUM SAVINGS.**: Our Solar-as-a-Service (SaaS) model helps businesses reduce energy costs and achieve sustainability goals – without upfront investment.
- LET'S BUILD A GREENER, MORE PROFITABLE FUTURE TOGETHER.**
- BENEFITS FOR YOUR BUSINESS**: Lower Electricity Bills, No Maintenance Worries, Reliable & High Performance, Protect Against Rising Tariffs, ESG & Sustainability Compliance.

A process flow at the top shows: **SUBSCRIBE** (Choose a plan that suits you) → **WE INSTALL** (We install solar at your facility) → **WE OPERATE** (We operate & maintain the system) → **YOU SAVE** (Save on electricity costs every month).

One Asia Pacific Utilities' **Solar-as-a-Service (SaaS)** platform transforms renewable energy from a capital-intensive investment into a fully managed energy solution.

Designed specifically for commercial and industrial organizations, the model enables businesses to benefit from clean solar energy through a long-term subscription framework while eliminating the need to own, operate, or maintain the solar infrastructure.

Each project begins with a comprehensive assessment of the customer's energy consumption, site conditions, structural suitability, and operational requirements. Based on this evaluation, our engineering team designs a customized solar solution optimized for maximum energy generation, long-term reliability, and operational efficiency.

From project conceptualization through engineering, procurement, installation, commissioning, digital monitoring, preventive maintenance, performance optimization, and lifecycle asset management, every aspect of the solar installation is managed by One Asia Pacific Utilities, allowing customers to focus entirely on their core business operations.

## End-to-End Project Delivery

Every renewable energy project is delivered through our integrated Concept-to-Commissioning (C2C) methodology, covering:

- Energy Audit & Consumption Analysis
- Site Assessment & Technical Feasibility
- Structural Evaluation & System Design
- Engineering & Detailed Project Planning
- Procurement & Supply Chain Management
- EPC Execution
- Grid Synchronization & Regulatory Approvals
- Testing & Commissioning
- SCADA-Based Remote Monitoring
- Preventive & Corrective Maintenance
- Solar Asset Management
- Performance Analysis & Optimization

## Intelligent Solar Asset Management

Our Solar Asset Management services ensure that every installation continues to deliver optimum performance throughout its operational life.

Using advanced SCADA platforms, predictive analytics, and centralized operations management, we continuously monitor plant health, energy generation, equipment performance, and operational efficiency. Preventive maintenance, rapid fault detection, performance optimization, warranty administration, and life-cycle planning maximize system availability while ensuring long-term reliability and operational excellence.

## Why Partner with One Asia Pacific Utilities?

- Complete Concept-to-Commissioning (C2C) project execution
- Expertise in Utility-Scale and Commercial & Industrial Solar Projects
- Flexible EPC and Subscription-Based (SaaS) delivery models
- Customized renewable energy solutions based on customer requirements
- Advanced engineering and international quality standards
- Comprehensive Solar Asset Management and O&M services
- High system reliability through proactive maintenance

## Quality Assurance and Commitment to Safety & Sustainability

Quality is the foundation of One Asia Pacific Utilities.

As an ISO 9001:2015 certified organization, the company follows stringent quality management systems to ensure consistency, reliability, and customer satisfaction across all operations.

The company encourages regular customer feedback and integrates valuable insights into product development and process optimization. A dedicated quality control team oversees every stage of production, ensuring products meet national and international standards.

The company follows stringent Environment, Health, and Safety (EHS) standards throughout its manufacturing and operational processes.

## Leadership

Mohammed Ali Pookoya

Chairman & Managing Director

Under his leadership, One Asia Pacific Utilities has significantly expanded its business portfolio, establishing a strong presence across renewable energy, global sourcing, industrial solutions, and other high-growth sectors.

The image shows a graphic for One Asia Pacific Utilities. On the left, there is a dark blue curved banner with the company logo, which consists of a globe icon followed by the word 'one' in a stylized font and 'asia pacific utilities' in a smaller font below it. Below the banner, the text 'ONE ASIA PACIFIC UTILITIES PVT. LTD.' is displayed. To the right of this text are four contact details, each with a small icon: a building for the corporate office, a telephone for contact, an envelope for email, and a globe for the website. The background of the graphic is a photograph of a modern office interior with a reception desk, a world map on the wall, and a potted plant.
